

Workforce Assist - Get Ready for Work

Are you looking for work?

In this program, you will learn some new skills in communication. Learn about how to get through an interview, how to present yourself with confidence and what to expect.

We will mix it up and make sure you have plenty of hands on experiences with a session each day in the MakerSpace where you may learn skills using basic hand tools to create a small project or maybe grab some clay and make a pot! The creative possibilities are endless.

Light Lunch Included

Accredited Units of Competency
